## Úvod

Výsledky kontroly užitkovosti (dále KU) za kontrolní rok 2015/2016 jsou zpracovány ze všech stájí zapojených do KU hodnocených metodou A4 (A4P), A4A a AT (A4T) a od krav, které ukončily normovanou laktaci. Do zpracování nejsou zařazeny výsledky krav s laktací kratší než 240 dnů a s užitkovostí nižší než 2 000 kg mléka. Označení zemědělských podniků a stájí spolu s charakterem stáje je převzato z hlášení jednotlivých podniků a podle stavu koncem kontrolního roku 2015/2016.

V kontrolním roce 2009/2010 byla zavedena celá řada změn ve vykazování jednotlivých plemen v kontrole užitkovosti. Plemenná příslušnost zvířete je definována podílem krve 51 % a více daného plemene. Za křížence jsou považována zvířata s podílem krve příslušného plemene menším nebo rovném 50 %. Dojená a kombinovaná plemena jsou značena podle zásad KU, kříženci jsou označeni K, jiná dojená a kombinovaná plemena X.

U výsledků za stáj, chovatele, popřípadě za vyšší celky je nově tištěna struktura podle plemen. Tiskne se pouze zastoupení tří nejpočetnějších plemen. Pokud však pro některé plemeno poklesne jeho zastoupení ze všech laktací pod 12 %, pak toto plemeno již tištěno není. Pokud se však mezi třemi nejpočetnějšími plemeny objeví některé z plemen J, N nebo L, tiskne se jeho zastoupení i při jakémkoliv nižším podílu. Barevné variety holštýnského skotu H a R se tisknou samostatně, tedy obojí H i R. Pokud se jedna z obou variet zanedbává, poněvadž její podíl poklesl pod 12 %, je její podíl přičten k varietě tištěné (např. zjištěné zastoupení plemen ve stáji je C46H43R09, vytíštěno bude H52C46). Pokud se zanedbávají obě variety H i R, ale jejich součet dosáhne alespoň 12 %, tiskne se převažující varieta s uvedením procentického zastoupení součtu obou variet.

V kontrolním roce 2009/2010 došlo ke změně publikace zápisu stáje v plemenné knize.

Zápis stáje do plemenné knihy je změněn v souladu se zásadami vedení kontroly užitkovosti z roku 2010.

Zpracování výsledků podle plemen v celé populaci vychází ze skutečné plemenné příslušnosti jednotlivých krav. Ukončené laktace jednotlivých krav jsou zpracovány ve stáji, kde byla laktace ukončena. Tisk stájí se provádí za předpokladu ukončení alespoň 5 laktací. Výsledky stájí se 4 a méně laktacemi jsou zahrnuty do výsledku zemědělských podniků a do souhrnných přehledů i když se netisknou. Číselné údaje v jednotlivých tabulkách zahrnují výsledky, kde je uvedena užitkovost krav na 1. laktaci, průměrná užitkovost krav na 2. a vyšší laktaci a průměrnou užitkovost za všechny laktace.

V úvodu publikace je zařazen přehled celkových výsledků KU v ČR (metoda KU A4 (A4P), A4A a AT a celkem). Tento přehled je členěn na první, druhé a vyšší laktace a celkové výsledky za ČR. Další část tohoto přehledu tvoří výsledky jednotlivých podniků a krav členěných podle intervalů dojivosti za normované laktace, počet vyražených krav a příčiny jejich vyražení (bez ohledu na to, kdy byla laktace ukončena), zařazení plemenic do tříd užitkovosti (podle všech laktací krávy). Počet krav podle pořadí laktace je sestaven podle počtu krav, které jsou zapojeny do kontroly užitkovosti ke konci kontrolního roku. Na celostátní přehledy navazují přehledy o užitkovosti krav zapsaných do plemenné knihy. Tyto přehledy jsou členěny podle oddílů plemenných knih jednotlivých plemen.

Seznam nejlepších stájí zahrnuje výsledky od všech krav ze stájí, kde bylo ukončeno alespoň 5 laktací.

Přehled krav s nejvyšší produkcí bílkovin a tuku za normovanou laktaci informuje o 100 nejlepších plemenicích českého strakatého plemene a 100 nejlepších plemenicích holštýnského plemene, ostatních plemen a kříženců.

V další části publikace jsou uvedeny výsledky jednotlivých stájí, zemědělských podniků, případně kooperujících celků a krajů v Čechách a na Moravě.

Všechny uvedené výsledky zpracovala za kontrolní rok 2015/2016 společnost Plemdat, s. r. o., která je dceřinou společnosti Českomoravské společnosti chovatelů, a. s.

## Introduction

Milk recording (hereinafter only referred to as the MR) for the control year of 2015/2016 in all stables involved in MR evaluated by method A4 (A4P), A4A a AT (A4T) and from cows that terminated standardized lactation. Results of cows with lactation shorter than 240 days and with the production efficiency lower than 2,000 kg of milk are not included in the processing. Specification of agricultural plants and stables together with the character of stables is taken over from reports of individual plants and according to the state at the end of the control year of 2015/2016.

In the control year of 2009/2010, a lot of changes were introduced in showing individual breeds in the milk recording. Breed affiliation of an animal is defined by the proportion of blood exceeding 51% or more of the respective breed. Crossbreed is an animal with the proportion of blood of the respective breed lower or equal to 50%. Milking and combined breeds is marked according to the principles of milk recording, crossbreeds are marked with K, other milking and combined breeds with X.

As a new thing, the structure according to breeds is printed with results of a stable, a breeder or bigger units. Representation of the three most numerous breeds is printed. But if the representation of any breed drops below 12% in all lactations, it is not printed for the breed. But if the most numerous breeds include breed J, N or L, its representation is printed even in any lower proportion. Colour varieties of the Holstein breed H and R are printed separately, i. e. both H and R. If any of the variety is disregarded as its proportion dropped below 12 %, its proportion is added to the printed variety (e.g. if the found out representation of breeds in stable is C46H43R09, H52C46 will be printed). If both varieties H and R are disregarded, but their sum reaches at least 12%, the prevailing variety is printed while the proportional representation of the sum of both varieties is provided. In the control year of 2009/2010 there was a change in the record into the herd book.

Processing results according to breeds in the whole population is based on real breed affiliation of individual cows. Terminated lactations of individual cows are processed in the stable where lactation was terminated. Print of stables is carried out upon termination of at least 5 lactations. Results of stables with 4 or less lactations are included in the result of agricultural plants and in summary overviews, even when they are not printed. Numerical data in individual tables include results where the cow production efficiency is stated for the 1<sup>st</sup> lactation as well as the average production efficiency of cows in the 2<sup>nd</sup> and higher lactation and the average production efficiency for all lactations.

In the introduction of the publication there is a summary of overall results of milk recording A4 (A4P), A4A a AT and total). This summary is classified into the first, the second and higher lactations and overall results in the Czech Republic. Another part of the summary is made up of the results of individual plants and cows classified according to intervals of milk yields in standardized lactation, the number of excluded cows and the reasons for their exclusion (regardless of when lactation was terminated), including breeding cows into production efficiency classes (according to all lactations of a cow). The number of cows according to the order of lactation is given according to the number of cows that are included in the milk recording at the end of the control year. Overviews of production efficiency of the cows entered in the herd book are linked to the national overviews. These overviews are classified according to individual sections of the herd book of the Fleckvieh breed and sections of the herd book of the Holstein breed. The list of the best stables includes results from all cows from stables where at least 5 lactations were terminated.

The list of cows with the highest protein and fat production during standardized lactation informs about top 100 breeding cows of the Fleckvieh breed and top 100 breeding cows of the Holstein breed. In another part of the publication, results of individual stables, agricultural plants or cooperating units and regions in Bohemia and Moravia are provided.

All the mentioned results were processed for the control year of 2015/2016 by Plemdat, Ltd. which is an affiliated company of Czech Moravian Breeders' Corporation, Inc.

## Uzávěrka kontroly užitkovosti za údobí říjen 2015 – září 2016 výsledky krav zapsaných do plemenné knihy - vysvětlivky Milk Recording Results - Cows Recorded in Herdbook (abbreviations)

Výsledky kontroly užitkovosti (krávy zapsané v plemenné knize) – Milk recording results (cows recorded in herdbook). Výsledky za metodu KU: A4 (A4P), A4A a AT – results of milk recording according to methods used in milk recording.

1. laktace – 1<sup>st</sup> lactation

2. a vyšší laktace – 2<sup>nd</sup> and other lactation

Celkem – total

Zapojeno krav v KU – number of recorded cows

Laktací –lactations

Celkem - total

Normované – standard lactations

Neuznaných –disown lactations

Nenormální – abnormal end of lactations

Prům. poř. (laktace) – number of lactation days

Lakt. dny – days of lactations

Mléko kg – milk in kg

Tuk %, tuk kg – fat in %, fat in kg

Bílk. %, blk kg – protein in %, protein in kg

Lakt. % (laktóza) - lactose

Věk – age at first calving

Mezidobí – calving interval

SP (servis perioda) – days open

Index P<sub>2:1</sub> – Index 2<sup>nd</sup> 100 days of lactation / 1<sup>st</sup> 100 days of lactation

Celoživotní užitkovost – milk yield production per production life

Vyřazené – culling

Žijící – living

Vyřazeno v roce – culling in control year

Prům. počet oitel. (otelení) – average number of calving

Krav – cows

Mléko – milk

BLK (bílkovin)– protein

Tuk – fat

Počet normovaných laktací s užitkovostí kg mléka – share of recorded cows according to average milk yield production of cows

Počet laktací podle příčin ukončení (tabulka uvádí počty laktací podle příčin ukončení) – representation of finished milk production in the milk recording (the table shows number of lactations according the reasons of ending)

Normované laktace – standard lactations

305 dnů – 305 days

240 – 304 dnů – 240 – 304 days

Nenormální – abnormal lactations

Nesplňující hranici pro – unrealizable level for

Zaprahlé (před 240 dny) – cows in dry period (before 240 days)

Vyřazené – culling

Dny (zaprahnutí před 240 dny) – days dry period (before 240 days)

Mléko (užitkovost nižší než 3 000 kg mléka)– milk (milk yield less than 3 000 kg of milk)

Dny + M – days dry period (before 240 days) + milk (milk yield less than 3 000 kg of milk)

Celkem – total

Počet vyřazených krav v roce podle příčin vyřazení – number of culling cows according the reasons of culling

Rušení KU – canceling of milk recording

Užitkovost – milk production

Vysoký věk – high age

Ost. zoot. důvody – other zootechnical reasons

Onemocnění vemene – mastitis

Plodnost – fertility

Těžký porod – heavy birth

Ostatní zdravotní důvody – other health reasons

Celkem - total

Počet krav zařazených do třídy užitkovosti – number of cows which are included in class of performance

Počet stájí s průměrnou užitkovostí kg mléka – the share of stables according to average

milk yield of cows

Prvotel. stáje – first calver stable

Ostatní stáje – the other stable

Celkem – total

Počet krav podle pořadí laktace, zapojených do KU koncem kontrolního roku – lactation number of recorded cows

Pořadí laktace – lactation number

Počet krav – cows number

Více – more than

Seznam stájí s vynikající užitkovostí za ukončené laktace všech krav - vysvětlivky

Best Breeders in Different Herd Size Groups –abbreviations

5 až 10 laktací – 5 – 10 completed lactations

11 až 30 laktací – 11 – 30 completed lactations

31 až 60 laktací – 31 – 60 completed lactations

61 až 100 laktací – 61 – 100 completed lactations

101 až 200 laktací – 101 – 200 completed lactations

201 až 300 laktací – 201 – 300 completed lactations

301 až 500 laktací – 301 – 500 completed lactations

500 a více laktací – 500 and more completed lactations

Pořadí stáje – rank

Zemědělský podnik – breeder

Stáj – city, farm

Kraj – region

Převaž. plemeno – main breed

Počet laktací – lact. record

Prům. pořadí – average number of lactations

Lakt. dny – days of lactation

Mléko kg – milk in kg

Tuk % - fat in %

Tuk kg – fat in kg

Blk % – protein in %

Blk kg – protein in kg

Mezidobí – calving interval

Prevaz. plemeno – In the control year of 2009/2010, a lot of changes were introduced in showing individual breeds in the milk recording. Breed affiliation of an animal is defined by the proportion of blood exceeding 51% or more of the respective breed. Crossbreed is an animal with the proportion of blood of the respective breed lower or equal to 50%. Milking and combined breeds is marked according to the principles of milk recording, crossbreeds are marked with K, other milking and combined breeds with X. As a new thing, the structure according to breeds is printed with results of a stable, a breeder or bigger units. Representation of the three most numerous breeds is printed. But if the representation of any breed drops below 12% in all lactations, it is not printed for the breed. But if the most numerous breeds include breed J, N or L, its representation is printed even in any lower proportion. Colour varieties of the Holstein breed H and R are printed separately, i. e. both H and R. If any of the variety is disregarded as its proportion dropped below 12 %, its proportion is added to the

printed variety (e.g. if the discovered out representation of breeds in stable is C46H43R09, H52C46 will be printed). If both varieties H and R are disregarded, but their sum reaches at least 12%, the prevailing variety is printed while the proportional representation of the sum of both varieties is provided.
